

Adult – Adult Cardiac Assessment Fast Track

Course Description: This module summarizes the full Adult Cardiac Assessment course. It highlights cardiac risk factor reviews, history taking, interview techniques, common causes of chest pain, assessment tips, chest pain treatments, and indications for thrombolytic therapy.

Course Objectives:

- Offer guidelines and tips for doing history interviews
- Explain the importance of risk-factor reviews and their contribution to treating cardiac disease
- Differentiate between good and bad cholesterol, and discuss risk ratios
- Describe cardiac chest pain and list other common causes of chest pain
- Briefly describe chest-pain treatments, and indications for thrombolytic therapy
