

Bloodborne Pathogens

Course Description: This course follows OSHA's Bloodborne Pathogen Standard, 29 CFR 1910.1030. It provides a basic understanding of bloodborne pathogens, their modes of transmission, universal precautions, and post-exposure procedures.

Course Objectives:

- Define what is meant by bloodborne pathogens
- List the modes of transmission for bloodborne pathogens
- Explain how hospital employees can help to prevent the transmission of bloodborne pathogens
- List emergency and follow-up procedures that can be used post-exposure
